

SONGLINES: CHARTING RESURGENCE

Online Workshop | 05.11.2020 | 10:00 – 13:00

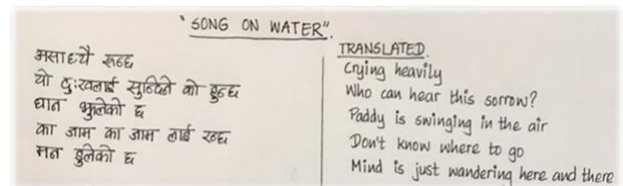

This workshop explores Songlines as a potential methodology for mapping Nature-based Adaptation projects.

Advancing the Sustainable Development Goals

- 3 presentations, tracing Songlines from Indigenous Australian, Early-Modern English and Contemporary practice-based perspectives.
- Q & A, with responses from poet-singers and Nature-based Solutions practitioners.
- Practice-focused break-out sessions exploring how Songlines might be used to foster resurgence.

Curating Songlines in local dialects fosters:

- Biodiversity by valuing language diversity; they are linked.
- The active participation intrinsic to community-based adaptation.
- Assessment of the long-term impact of Nature-based Solutions by analysing how their poetics charts resurgence.

Created at the start of the '[Rain Communities](#)' project, could this song feed a Songline of resurgence? [LISTEN HERE](#)

Contributors Include:

Nirmal Adhikari, David Higgins, Musonda Kapena, Martin Leer, Pippa Marland, Gnilane Ndiaye, Sanjib Poudel, Yoann Provenzano, Ndiaga Sarr, Roy Sellars, Devimaya Subedi, Marc Sylvestre

Funded by the Swiss Academy of Humanities and Social Sciences

In partnership with the International Rainwater Harvesting Alliance
